

# TRENDING GIFT SELECTIONS 2024

2024 |

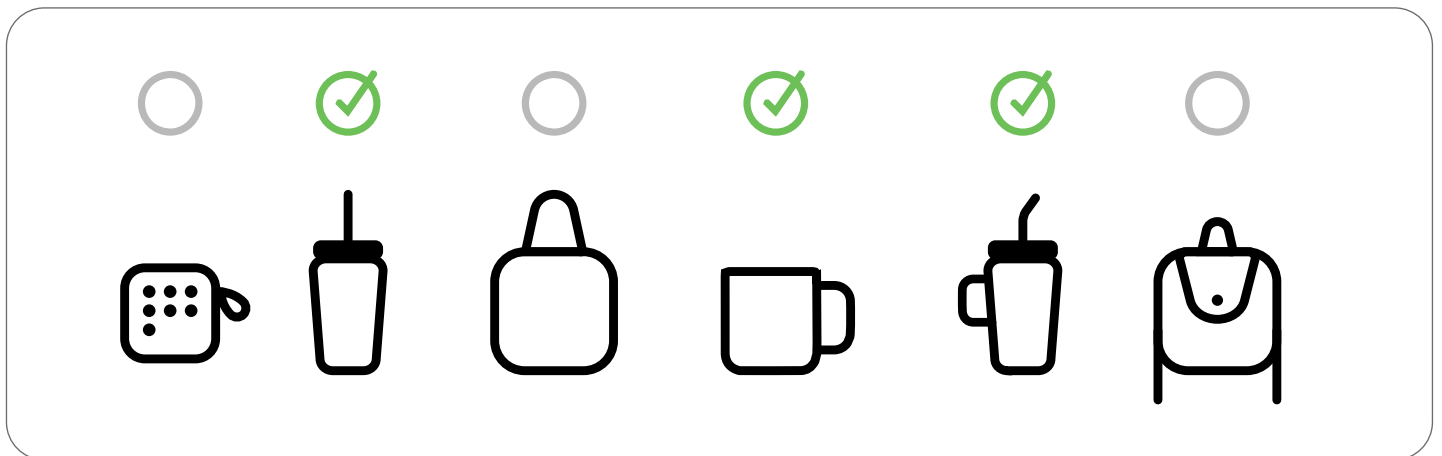

Elevate your customer experience with personalized gift sets designed to WOW!

Let us assist you in crafting a memorable gift that reflects your commitment to excellence.

## Step 1

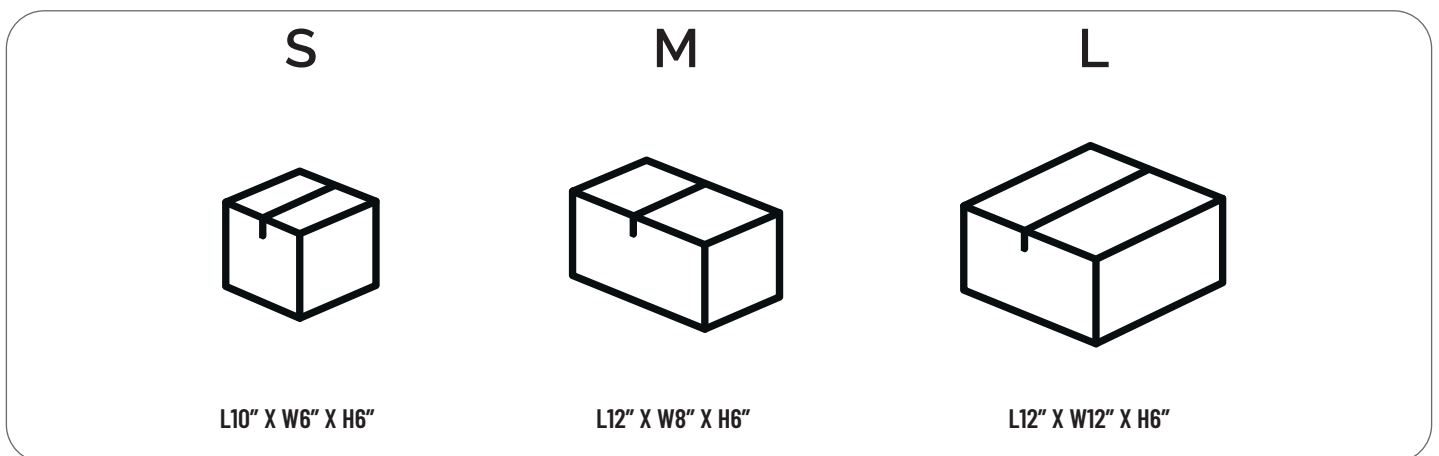

Select your customer's favorite items.

## Step 2

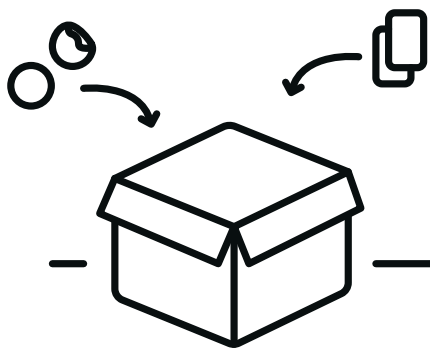

Choose your box size

We will nest your chosen items in natural crinkle paper

## Step 3

Embellish your box with optional add-ons

## Step 4

Determine your fulfillment choice

# Unique Decoration Methods

## Mosaic

Introducing the latest breakthrough in digital printing technology: the ability to print full color on to handled items. This innovation opens a world of creative possibilities, allowing for vibrant and detailed designs.

## Color Changing Ink

Discover the magic of transformative ink. With ten color options, these cold color changing inks leave customers in awe and are dishwasher safe. Ideal on glass items and single-wall metal drinkware.

## Laser 360+

We've taken the elegance of traditional laser to the next level through an innovative full wrap method. Laser 360+ delivers the wow-factor on many of our popular metal drinkware products.

## Elevation

State-of-the-art printing process in which a clear or colored gel-like ink is used to create a 3-D effect, rendering a high-end embossed look without the high-end cost.

## Fresco Digital Print

Allows printing in full color on drinkware and an assortment of flat items, such as on lids, the bottom of some drinkware pieces, lunchboxes, and electronics.

## Inserts

Confetti, glitter, burlap, and metallic are some of the many options that can be inserted into double-walled drinkware outside of traditional paper and film inserts.
